We all know the disaster these birds create to offices, residences, shopping malls, factories, warehouses & all commercial & domestic buildings. In U.A.E, it is a major problem, it is common to feed birds, but the brunt is borne by property owners. Apart from being an eyesore and a menace to clean, bird feces spread diseases like Salmonellosis, Encephalitis, Cryptococcosis, and other breathing & skin disorder problems.

**AL RAFE** stainless steel spikes, Bird Wire & Bird netting have enjoyed success in U.A.E, offering great relief from bird problems. It is a simple concept. A bird cannot sit on spike or bird wire. ARBM has a patented design & does not harm the birds. It simply doesn't allow them to land nor sit on the installed surface.

**AL RAFE** is patented. The technology comprises of stainless steel spikes fixed on a transparent Virgin Grade Polycarbonate base (with UV Stability). Glued with a powerful adhesive to any surface, the spikes simply prevent the birds to perch. Simple & cost effective, this is 100% humane to the birds & does not harm them in any way!

Our Bird Control team is trained by American Experts in bird control industry. We specialize in urban bird control to remove pest birds humanely & effectively. Our expertise includes installation of latest bird control products using the most advance technology in the world.

No matter how large your project is? Our Bird Control expert staff will be there to provide sales & installation support every step of the way.

A discreet and effective system to bird proof your property.
